We're so excited to give you access to this full-length printable SAT practice test. This practice test was put together by SAT prep expert Chris Lele, Magoosh's Principal Curriculum Manager. He and our experts have spent days crafting the 154 questions you'll find inside, which we then thoroughly student- and tutor-tested until the data told us that the test was more than up to snuff. Sign up below to access the free practice test PDF! So what will you see in the PDF? Well, 154 questions, to start. But beyond that, the test has... SAT Reading Test (65 Minutes, 52 Questions) SAT Writing and Language Test (35 Minutes, 44 Questions) SAT Math Section – No Calculator Test (25 Minutes, 20 Questions) SAT Math Section – Calculator Test (55 Minutes, 38 Questions) An answer key Information on grading your test Links to text and video explanations for every single question on each section of the test Where to Find Full-Length SAT Practice Tests (Even Official Ones) There are a few great places to look for full-length SAT practice tests! Here are our top recommendations: Khan Academy: Khan Academy has paired up with the College Board (they're the test creators) to offer free online practice SAT tests. There are four full exams on the Khan Academy site, which can also be found on the College Board site. After you've taken an exam or two, you can then sharpen your skills with practice in different areas with resources on Khan Academy's site and elsewhere. Prep books: But beware! While prep books can be great for lessons, they tend to be better for learning than for full-length practice tests. Yes, the College Board's book is awesome, but guess what? Those eight tests are the same eight tests you can find on their website, just printed and bound (they're transparent about this). There are a few great books out there and a few to avoid—you can check them out in Magoosh's post on the best SAT books and our review of the Princeton Review's practice tests! Magoosh Prep: you can choose between a live cohort class with an instructor (which includes all our lessons and practice questions) or access to the self-study option by itself. Why do I need to take a full-length practice test? To maximize your score on the SAT, you'll need three things: Lessons Practice questions Practice tests And despite what a lot of students believe, those last two aren't interchangeable! Lessons are super valuable for reviewing content that you might not have seen for a while—or ever. Practice questions are great for making sure you've mastered (and continue to remember) the lesson content. Learn it, practice it...why the third step? Well, first of all, the official SAT won't have an "algebra" problem set or a "geometry" problem set. It'll have all kinds of question types mixed together within the three sections. That means that studying different content areas is a very different experience from test day, when you'll be in front of the exam for at least three hours (more if you're taking the essay). So you need to get ready with multiple practice tests! How to Take an SAT Practice Test Ready to mimic the official experience? Fantastic! All students can benefit from taking an SAT practice test—unless your test is the next morning, in which case, get your rest! For the rest of you, here's what to do: Set aside approximately four hours of uninterrupted time to take the practice test. Take the test in a quiet place where you won't be distracted. Mimic test day conditions by turning off your phone and leaving it in another room. Take the test in a quiet place where you won't be distracted. Try to take the entire practice test in one sitting. Eat a healthy, energizing snack before taking the practice test. Give yourself a brief, 10-minute break after the Reading test. Give yourself a brief, five-minute break after the Math (No Calculator) test. Use a countdown timer and remember to reset it for each test. Lucky for you, you don't have to remember half of these steps if you follow our simulated SAT practice test below, proctored by Magoosh curriculum manager Kat. All you'd need to do is print your test, find a quiet place, set aside a few hours, and press play to simulate a test-day experience in the comfort of your own home! What to Do After Practice Tests After the test, it is critical that you check your answers and make note of any questions you missed. In fact, it's a good idea to spend at least as much time examining your results as you did taking the test. Why? Well, did you get a question right because you knew the answer, or because you were guessing? Did you get a question wrong because you filled in the wrong bubble? (Practice tests help a lot with this latter problem, by the way!) Make sure to check the explanations for every question you get wrong, so that you don't repeat the same mistakes on test day. After you've examined your results, do some practice in your weak areas. Signing up for Magoosh SAT Prep is a great way to learn or relearn concepts you need help with and get access to additional practice problems. After working on your weak areas and brushing up on your strong areas, take another test and do the same process all over again! In the next section, we highlight some practice that will help you structure your SAT prep after taking your first practice test. Free Practice Materials While free practice resources for the SAT may not be as easy to find once you've finished the work available here and on the College Board site, don't worry! There are plenty of other online resources—both free and low-cost (including this blog!)—that will allow you to target your weaker areas and keep your strong areas strong. A Final Word You've made it this far. Congratulations! The SAT can have many implications for the college admissions process, which can intimidate students. Getting this far shows commitment—the same kind of commitment you need to master the SAT. So what are you waiting for? Dig out those #2 pencils, find yourself a quiet corner, and get on it! It's time to start boosting your test score. Rachel is a Magoosh Content Creator. She writes and updates content on our High School and GRE Blogs to ensure students are equipped with the best information during their test prep journey. As a test-prep instructor for more than five years in three different countries, Rachel has helped students around the world prepare for various standardized tests, including the SAT, ACT, TOEFL, GRE, and GMAT, and she is one of the authors of our Magoosh ACT Prep Book. Rachel has a Bachelor of Arts in Comparative Literature from Brown University, an MA in Cinematography from the Université de Paris VII, and a Ph.D. in Film Studies from University College London. For over a decade, Rachel has honed her craft as a fiction and memoir writer and public speaker. Her novel, THE BALLERINAS, is forthcoming in December 2021 from St. Martin's Press, while her memoir, GRADUATES IN WONDERLAND, co-written with Jessica Pan, was published in 2014 by Penguin Random House. Her work has appeared in over a dozen online and print publications, including Vanity Fair Hollywood. When she isn't strategically stringing words together at Magoosh, you can find Rachel riding horses or with her nose in a book. Join her on Twitter, Instagram, or Facebook! View all posts Chris Lele is the Principal Curriculum Manager (and vocabulary wizard) at Magoosh. Chris graduated from UCLA with a BA in Psychology and has 20 years of experience in the test prep industry. He's been quoted as a subject expert in many publications, including US News, GMAC, and Business Because. In his time at Magoosh, Chris has taught countless students how to tackle the GRE, GMAT, SAT, ACT, MCAT (CARS), and LSAT exams with confidence. Some of his students have even gone on to get near-perfect scores. You can find Chris on YouTube, LinkedIn, Twitter and Facebook! View all posts By the way, Magoosh can help you study for both the SAT and ACT exams. Click here to learn more! What is SAT exam syllabus? The SAT exam syllabus has a total of 3 sections. The three sections of the SAT syllabus are Reading, Writing, and Mathematics. Earlier, there was an optional essay writing section which was recently discontinued by the SAT College Board. Thus, the subjects in SAT are reading comprehension, writing, and maths. Read this blog to know more about the SAT syllabus for each of these sections, types of questions in SAT, sample papers and more! SAT Exam Syllabus PDFDownload Highlights SAT Exam 2022 The SAT exam is a standardized test that helps universities examine where a candidate stands in a more objective manner. The test is a good criterion for universities and examiners to figure out how well prepared you are for college as well as get a better idea about the skills you've developed in school. This exam was earlier classified into two types, i.e. SAT Subject Test and SAT General Test. But recently, the SAT Subject Test has been scrapped by the SAT College Board. Below, we have discussed the aims of the SAT Exams: SAT General Test Mainly taken by students wanting to get admission into undergraduate programmes, SAT General Test aims to evaluate candidates on their written, verbal and mathematical skills. As the name suggests, the SAT syllabus for the General Test assesses general knowledge as well as critical reasoning. Focusing on particular disciplines or subject areas, there is a total of 20 subject tests which are bifurcated into 5 subject areas, namely, Languages, History, English, Mathematics and Science. These subject areas are divided into specific topics that are evaluated through a subject test. SAT Syllabus 2022 Credit: College Board Now that you are familiarized with the paper pattern of this exam, let's elaborate upon the Reading, Writing, Mathematics and Essay (discontinued) section of the SAT exam syllabus and what they aim to assess: SAT ReadingComprising of reading comprehension, every passage under this section has 10-11 questions. Having a total of 5 passages of varying lengths, this section aims to evaluate your ability to comprehend written text, understand the meaning of words in different contexts as well as their associated terms with implied meanings. SAT WritingHaving 4 passages with 10-11 questions each, you are expected to find errors, rephrase, and rewrite highlighted sentences with alternative text, amongst others. It focuses on assessing the candidate's understanding of vocabulary as well as grammar. SAT MathematicsConstituted of two sub-sections divided into the 25-minute section provided with no calculator and a 55-minute section with a calculator allowed. It has 58 questions spread across varied basics of mathematics such as algebra, statistics, geometry, arithmetic, probability, data interpretation, and problem-solving questions. SAT Essay (Discontinued)Aiming to analyse one's quality of writing as well as English comprehension, this section has an essay question (650-700 words) focusing on an issue and asking the candidate to take a stance on one side of the topic. Make sure you keep your analysis limited to the given data with precise explanation and don't elaborate upon personal opinions. SAT Exam Pattern 2022 The total duration of the examination is 3 hours. The test scores range between 400 and 1600 points. The exam syllabus is bifurcated into 3 sections, these include Reading, Writing and Language, and Mathematics. Take a look at the following table which elucidates the SAT exam pattern in detail. SAT Writing Syllabus The questions in this section of the SAT syllabus will test your evidence-based reading and writing skills. In this section, your writing and reading abilities are tested. The topics for the articles or write-ups are mainly centered on generic topics that do not necessitate your prior knowledge of the subject. In fact, certain passages have supplementary graphs and charts to assess your imperative skills. SAT Writing Exam Pattern You have to attend 44 multiple choice questions in 4 passages in 35 minutes You need to edit passages One of the following modes of writing will be present in the exam out of the narrative, argumentative and informative/explanatory The passages revolve around topics like, Humanities Science Careers History & Arts Social Sciences Type of Questions in SAT Writing You will be expected to answer certain questions pertaining to the passages, some examples of the questions asked in the writing section of the SAT exam syllabus are: Sentence structure, verb tense, punctuation, parallel construction, grammar usage, subject-verb agreement, etc. Strengthen/weaken the argument Word choice for style, text or tone Structural changes to improve readability SAT Reading Section Syllabus This section of the SAT exam syllabus focuses on evidence-based reading and writing. This test will especially focus on your reading abilities. SAT Reading Exam Pattern The exam pattern will have 52 multiple choices in 5 passages to finish in 65 minutes. Two passages will be from science fields One literary passage will be from Classics or contemporary texts of the US or world literature Texts from the U.S. founding documents or Great Global Conversation on topics like dignity, human rights, freedom, etc Extracts from Economics, Sociology, Psychology, amongst others. You must answer questions by telling a story, giving an argument or explaining an experiment or study Type of Questions in SAT Reading The function a phrase serves in the passage The tone, style, perspective, and attitude of the author Analyzing data on the basis of diagrams, charts, and graphs The central theme or main idea of the passage Inference of a phrase in a paragraph Arguments or evidence that supports the author's stance Useful Tips: The format of the examination does not expect prior knowledge of the passage topics from you but with constant practice, you can develop a familiarity that will help you in answering the reading and writing sections of the SAT exam syllabus more effectively. SAT Maths Syllabus Most students fear the mathematics section of competitive exams, but if you have a fair idea of what this part of the SAT exam syllabus comprises, then you will be able to prepare for it in an effective manner. The mathematics section is divided into two parts – one with a calculator and another section that students need to solve without using a calculator. SAT Mathematics Pattern The mathematics section comprises of two sections: One with a calculator. Second without Calculator You need to attempt a total of 58 questions in 80 minutes 80% of questions are multiple-choice while 20% of them are grid ins For Maths with a calculator: You have 30 MCQs and 8 grid-in questions You need to enter your derived answers in the bubble sheet you are provided Maths without calculator has 15 multiple choice questions and 5 grid-in questions You will be given a set of formulas and references at the beginning of the test If you are applying for courses in science, engineering or maths, pay special attention to the 'Maths without Calculator' section Type of Questions in SAT Maths Algebra Graphical representation of the linear function Linear equations with rational coefficients Linear inequalities in two variables and their systems System of linear equations (with no solution, infinite or finite solutions) Data Analysis & Problem Solving Percentages Ratio and Proportion Unit conversion Equation of line or curve using a scatterplot Two-way tables to calculate conditional frequencies and conditional probabilities Association of variables or independence of events Estimation of a population parameter Calculation of mean, median, mode, range and standard deviation in statistics Evaluation of reports to check the appropriateness of data collection methods Advanced Math Quadratic equations with rational coefficients Determining the form of an expression Polynomial equations (subtraction, multiplication, addition and division) Zeros and factors of polynomials Non-linear relationship between two variables Function notation Isolation of a variable by rearrangement of formula or equation. Useful Tips: The only way to ace the math section is through consistent practice of the various topics of the syllabus. Since math is based heavily on practical knowledge it is important that your basics of the concepts are absolutely clear. SAT Math 2 Syllabus Here is the syllabus for SAT Math 2 Subject Test (discontinued): Number and Operations Operations Ratio and Proportion Complex Numbers Counting Elementary Number Theory Matrices Sequences Series Vectors Algebra and Functions Expressions Equations Inequalities Representation and modeling Properties of functions (linear, polynomial, rational, exponential, logarithmic, trigonometric, inverse trigonometric, periodic, piecewise, recursive, parametric) Geometry and Measurement Coordinate Lines Parabolas Circles Ellipses Hyperbolas Symmetry Transformations Polar coordinates Three-dimensional Solids Surface area and volume (cylinders, cones, pyramids, spheres, prisms), coordinates in three dimensions Trigonometry Right triangles Identities Radian measure Law of cosines Law of sines Equations Double angle formulas Difference between SAT Mathematics Level 1 and Level 2 The major difference between SAT Mathematics Level 1 and Level 2 exams is that Level 1 contains topics like algebraic expressions, coordinate geometry, data analysis, and number sequences. However, Level 2 Maths includes all these topics along with logarithmic functions and the law of cosines and sines. Both exams have 50 questions that need to be finished in 60 minutes. SAT Essay 2022 Note: The College Board has announced the discontinuation of the SAT Subjects and the SAT optional Essay. The below information is only for your reference. While the essay component in the examination is optional, many universities expect you to score well in this section as well. Many universities also have it listed as a required or recommended section. The essay section of the SAT syllabus helps the university determine your reading, writing, and analytical skills simultaneously. This section is panned out in a manner where you will be expected to read a 650-700 words long passage, after reading the passage you will have to analyze how the author builds the argument and write it in a coherent manner in a 50-minute duration. Also Read: How to write Essay SAT Exam Syllabus for Medical The SAT Exam Syllabus for Medical is the same as the syllabus for other courses which has been explained above. How to Prepare for SAT Essays Note: The College Board has announced the discontinuation of the SAT Subjects and the SAT optional Essay. The below information is only for your reference. While preparing for this section, it is important that you understand how to develop an analytical approach to reading the paragraph so that you can write an analysis that is not tainted by your personal opinion or bias. This can only be mastered through continuous practice. Also, by engaging with articles of different authors helps you get a better idea about how different authors build their arguments. SAT Exam Preparatory Essentials Once you have a fair idea of the SAT syllabus, you will need certain resources that will help you prepare better for the examination. Here is a list of major books for SAT preparation that you must have: SAT Sample Papers Here are some official SAT sample papers you can practice to master the SAT syllabus: SAT Sample Paper 1 by College Board- Official Practice PaperDownload SAT Sample Paper 2 by College Board- Official Practice PaperDownload SAT Sample Paper 3 by College Board- Official Practice PaperDownload SAT Sample Paper 4 by College Board- Official Practice PaperDownload SAT Sample Paper 5 by College Board- Official Practice PaperDownload How to prepare for SAT? Mentioned below are some of the best ways and methods to prepare for the SAT. You can have a look here: Get Familiar With The Pattern Of SAT Learn Mental Maths Read Nonfiction Attempt Mixed Practice Tests Revise Quickly During Your Breaks Work On Your Weak Points Don Not Mugg! Revise Your Grammar Set A Score Goal Courtesy: Q School or Death FAQs What is SAT exam syllabus? SAT Exam comprises of Reading, Writing, Mathematics and an optional essay section. Candidates need to cover each section thoroughly in order to cover up the entire syllabus for the exam. Is SAT very difficult? SAT is not a very difficult exam but one it is not very easy either. As it is considered as one of the most reliable examinations for UG admissions abroad, one needs to take it seriously and prepare well for the same. What is the eligibility for SAT exam? SAT Exam requires no age limit. Anyone can appear for this exam. The best time to appear for the SAT exam is when you are a high-school student, i.e. in 10th or 11th class. What are the best books for SAT Exam? There are various books available for the SAT Exam, but, only when you refer to the best ones, you are likely to get a better understanding of each section. Keeping that in mind, we are curated an exclusive blog on best books for SAT preparation. What type of questions are asked in SAT? There are majorly 4 sections in SAT, i.e. Reading, Writing, Mathematics and Essay (optional). The Reading section comprises of 5 comprehension passages while the Writing section contains 4 passages. On the other hand, the SAT syllabus for Maths is divided into two sections, one with calculator and the other with no calculator. There are 38 questions in the Math section with permitted calculator use while 20 questions in the one without permitted calculator use.
